

Industry Outlook TOP 10 **GIS SERVICE PROVIDERS - 2022**

One cannot defy the importance of geographic information system (GIS) in scientific investigations, resource management, and development planning. The use of GIS is prolific and serves different sectors' various purposes efficiently enough, such as today retail businesses use GIS to help them determine where to locate a new store, while marketing companies use GIS to determine to whom to market stores and restaurants, and where that marketing should be. Capturing, storing, checking, and displaying data related to positions on Earth's surface, GIS technology proves to be a crucial part of spatial data infrastructure. Using GIS technology, where people can compare the locations of different things in order to discover how they relate to each other, GIS tools equip organizations with the tools for intelligent decision-making today for a more sustainable tomorrow.

Though, GIS is majorly used in medium-sized projects, which proliferate in the healthcare and defense sectors, with the rising healthcare and defense spending around the world, the usage of this GIS technology is also increasing. According to the Allied Market Research, GIS software market size is

projected to reach \$25.5 billion by 2030. Moreover, where the GIS market generated revenue was valued to be \$8,185.9 million in 2020, it is expected to grow at a CAGR of 11.6 percent during the forecast period 2020–2030. To relishing this bountiful of opportunities concerning the GIS technology tools and services, there are many key players reigning the geographic information system industry either manufacturing innovative GIS tools and technologies tailor-made to suit one's purpose or becoming a provider of such services in the space. However, to find an efficient GIS services provider from this swamping landscape can be an extensively confusing task to do.

Addressing to this concern of the readers, Industry Outlook in this issue presents a list of 'Top 10 GIS Service Providers – 2022' who have leveraged their extensive industry expertise and experience in offering high-precision GIS Services in the industry. The following list has been prepared after being closely scrutinized by a distinguished panel of judges including CXOs, analysts, and our editorial board. We recognize their valuable contribution to the ever expanding and competitive market and their ability to sustain themselves and emerge as top contestants through their notable services.

TOP 10 GIS SERVICE PROVIDERS - 2022

COMPANY	MANAGEMENT	DESCRIPTION
Aerial Geomatics Research Bangalore aerialgeomatics.com	Surendra Kumar R., Founder & CEO	The company provides advanced technology in BIM Modeling, Mapping, Planning and Surveying Industry using UAV's/Drones, Photogrammetry and GIS Solutions
CompuSense Automation Ahmedabad compusense.in	Chandrashekhar Vaidya, Partner	Equipped with the state-of-art GIS and Image Processing Software, it's one of the best GIS and Remote Sensing Application service provider
Enfragy Solutions India Kolkata enfragy.com	Balawant Joshi, Director	With a strong ICT back-up and sound knowledge in business consulting, delivery in the space of energy & water management, and more, the company is committed to excelling in customer focused services and building long term relationships
Geomac Solution Bhubaneswar geomacspl.com	Dr. H.K. Sahoo, CEO	A competent consultancy house providing world class consultancy and solutions in the field of Earth, Environmental and Agricultural Sector
GeoSpoc Pune geospoc.com	Dhruva Rajan, Co-Founder & Technology Director	A place where vision meets passion, they build solutions with location data that bring value to the table
GIS Consortium India Noida giscindia.com	Neeraj Sharma, Director	A technology driven GIS services provider that's set to leverage high quality and innovative GIS based solutions on the back of its experienced technical staff and its specialization in designing, developing, and deploying GIS solutions
J&T Entreprises Pune jntpune.com	Javed Shaikh, Chief Technology Officer	Established to provide services in the field of Geographical Information System, Software Development, and Engineering
Jomiso Consulting New Delhi jomiso.co.in	Vijay Kumar, Founder & Sneha Pathak, Co-Founder	A full-suite water resource consulting firm dedicated to transforming how water is channelled, optimised and consumed in communities across the globe
Marvel Geospatial Solutions Hyderabad marvelgeospatial.com	Raghu Boyapally, Founder & Managing Director	An ISO 9001:2015 certified Company, a business endeavor offering innovative, value-added Engineering & Spatial Technology Solutions to our customers around the globe
The Contractum Kota thecontractum.com	Jitendra Singh, Founder & CEO	Aspiring to be a flagbearer of top-notch quality in the India GIS market
